RE: VKGK Vat Leach Operation

Dear Mr. Muir:

Per our telephone conversation on September 16, 1991, I am sending to you some information regarding heap leaching facilities. Such facilities are designed to prevent and detect ground water contamination by the active leaching agent.

I suggest that you submit sketches of your proposed liner, containment methods, and other facilities now. Final plans for your facility must be submitted under the stamp of a registered professional engineer. Detailed requirements can be established only upon review of the information received from you. Please feel free to call on any questions.

Sincerely,

for Kiran L. Bhayani, P.E., D.EE., Manager
Design Evaluation Section
